316 Seamless Stainless Steel Tube

316 stainless steel tube has a maximum carbon content of 0.03, which can be used in applications where annealing cannot be carried out after welding and maximum corrosion resistance is required. The overall performance of this steel is better than 310 and 304 stainless steel. Under high-temperature conditions, when the concentration of sulfuric acid is lower than 15% and higher than 85%, 316 stainless steel has a wide range of uses. 316 stainless steel plate is also known as 00Cr17Ni14Mo2. Corrosion resistance: corrosion resistance The performance is better than 304 stainless steel, and it has good corrosion resistance in the production process of pulp and paper. Wuxi SDO [stainless steel factory](#) can provide various stainless steel products to meet your needs.
